# INTRODUCTION OF PVC

## WHAT IS PVC?

---

- PVC (Polyvinyl Chloride) is a wood-based hybrid material, consisting of polymer fibers, calcium carbonate, lubricants and other chemicals. Unlike wood, it is completely water proof and borer-termite proof.
- It is a futuristic product: 100% eco-friendly and engineered for durability.

## WHY VIVRE PVC

---

- The construction industry uses conventional materials like plywood or wood which cause deforestation and other different types of pollution.
  - Vivre extrudes it's PVC for it's PVC Foam Boards which make this process faster, while delivering a better quality product.
  - As one of the leading PVC players in India, Vivre PVC specializes in high quality wood plastic composite products by harnessing modern production lines, latest extrusion technology and skilled technicians.
