INTRODUCTION OF EVOWOOD LAMELLA

Vivre's EvoWood Lamellaes are made in various species of top-grade, seasoned wood, sourced from ecologically sustainable forests.

These are sturdy, eco-friendly, wooden-solutions that can be applied in places like wall paneling systems, ceilings, floorings, doors, wardrobes, modular furniture among other interior and exterior applications.

These sheets are made of natural wood and are not sliced veneer, therefore they are subject to high color and grain variation. Wood being a natural product is subject to surface cracks during change of weather and humidity.
